↑ STRENGTH

Quick replies carry the load

552 of 1,436 questions (38%) were tap-driven quick replies — promotions, MCard, directory — and resolved with zero apologies.

↑ STRENGTH

Balanced bilingual traffic

53% English, 47% Thai across free-form questions — ARC handled both without a language-specific quality gap.

! ATTENTION

Voice transcription errors dominate apologies

TranscriptionError alone accounts for 104 of 285 apologies (36%) — mostly garbled or unintelligible audio input, not a content gap.

! ATTENTION

One kiosk apologises far more than peers

Kiosk TheMall-004-M8-BKP-05 apologises on 29.6% of questions vs a 16–25% range for the other four — small volume, but worth a spot-check.
